

# QwikSwap® Azure®

## Variable Speed Motor Adapter

The QwikSwap® Azure® is a time and money saving solution that allows the immediate replacement of a failed OEM 4/16 pin variable speed ECM (Genteq 1.0, 2.0, 2.3, 3.0, Emerson/US Motors/Nidec, and communicating motors) with an Azure® ECM from MARS. Converts the variable speed signal to three varying speeds on the Azure® constant torque ECM.

### Compelling Benefits

- Saves time and money.** A single QwikSwap® Azure® with an Azure® motor can replace most OEM variable speed motors from all equipment brands 1/3 – 1 HP. Don't waste time chasing expensive OEM replacement motors/modules. Get the customer up and running immediately.
- Aids in the troubleshooting of variable speed motor equipped systems.** Blower motor not operating? You replace the expensive motor only to find there is also a problem with the HVAC control board. Explain this to your customer; or use the QwikSwap® Azure® to confirm HVAC control board operation PRIOR to replacing the motor. A more accurate diagnosis allows for a more accurate cost estimate to the customer.
- Provides a temporary blower motor replacement solution.** If the customer insists on an OEM replacement variable speed motor, but it is not immediately available, install the QwikSwap® Azure® and have the customer comfortable until the OEM motor becomes available.

### Simple Installation

**Step 1:** Move factory harnesses from OEM variable speed motor to QwikSwap® Azure®

**Step 2:** Install Azure motor (MARS Nos. 10865/10866) and connect speed taps to QwikSwap® Azure®

**Step 3:** Move on to the next service call

Installation Video

MARS NO.	DESCRIPTION
08506	QwikSwap® Azure® Variable Speed Motor Adapter (for use with Azure® MARS Nos. 10865/10866)
10868	QwikSwap® Azure® w/Azure Motor (115/230V, 1/3 – 1/2 HP)
10869	QwikSwap® Azure® w/Azure Motor (115/230V, 3/4 – 1 HP)

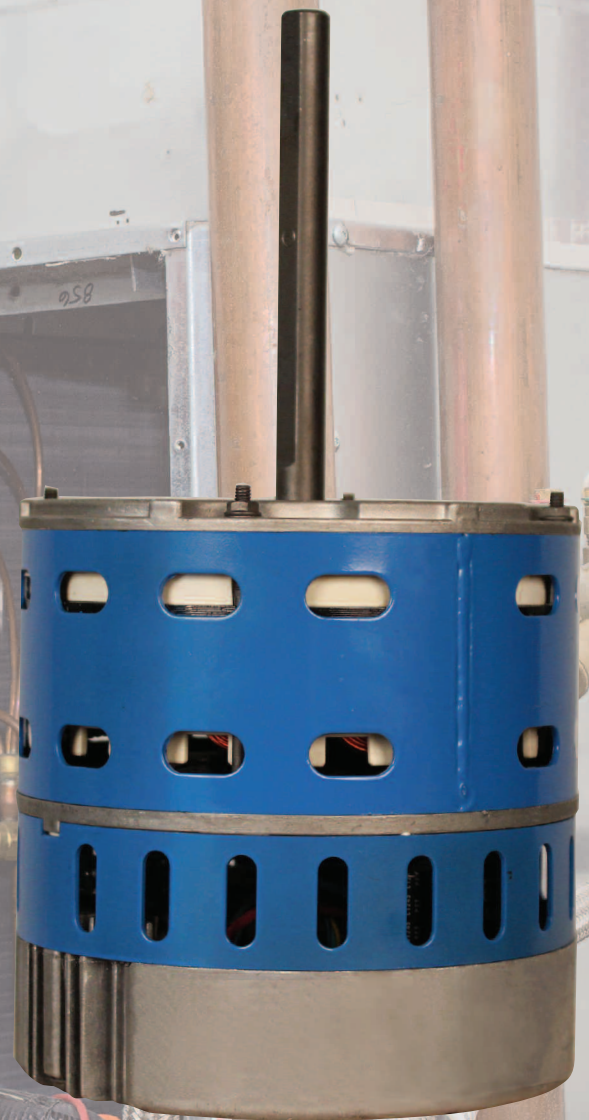

# NEXT GENERATION OF ECM

## Drop-In ECM Direct Drive Replaces Standard PSC Motors And OEM Variable Speed Motors\*

\*Genteq 1.0, 2.0, 2.3, 2.5, 3.0, Communicating Emerson/US Motors when used with QwikSwap® Azure® MARS No. 08506

- No Programming Required
- Constant Torque Design
- Simple Line Voltage Speed Taps (115V PSC control logic)
- Ultimate Truck Stock Motor
- Saves Time and Money

MARS NO.	DIA.	HP	VOLTS	SPEEDS	ROT	INCLUDES QWIKSWAP® BOARD
10865	5.5"	1/3-1/2	115/230	5*	REV	NO
10866	5.5"	3/4-1	115/230	5*	REV	NO
10868	5.5"	1/3-1/2	115/230	5*	REV	YES
10869	5.5"	3/4-1	115/230	5*	REV	YES

\*Optional hand held programmer MARS No. 08502 allows manual adjustment of as many as 80 speeds on 4 separate taps
